Total Security System, which includes Access Control, Time & Attendance, Parking Control, Elevator Control and more

Vietnam Post & Telecommunication

Owned and operated by the Vietnamese government, Vietnam Post & Telecommunication holds the largest nation wide communication infrastructure in the country of Vietnam. As one of the dominant telecommunication service provider with largest market shares, VNPT provides various services such as wire telephone services, mobile services, internet services and many more.

Security Market of Today

Emerging from the ordinary access control and time & attendance management of the past, ever so quickly changing today's security market demands all-around security solution that is capable of the entire building management, which includes parking, lobby gate, elevator and other facilities within the building. The demanded system also requires real time management of the sites in different regions for responsive countermeasures and strengthened security level. Today's total security system has evolved into something that the users only dreamt about in the past.

Solution

With 20 years of expertise in the security industry, IDTECK provides top of the line total management solution, which offers flawless compatibility with other existing systems in the building such as BAS, to meet the requirements and needs for customers all around the world. Out of many IDTECK's best selling products, iTDC, 2-4 door control panel and its management software, STARWATCH iTDC Pro II guarantees not only the supreme access control and the time & attendance management features, but also includes an extensive real-time monitoring of visitor management, personal tracking, elevator control, parking management and many more countless applications. In addition, Data Export function allows easy system integration with existing IBS and other H&R programs to maximize the user convenience.

Great Success and Great Result

TECHPRO, IDTECK's exclusive distributor of the Vietnam region, have successfully furnished the total security system at the newly constructed Vietnam Post & Telecommunication Site building. For this 24 stories tower, all of the security hardware devices and software used in this project were IDTECK products, which increased the performance as well as the expendability of the system. Satisfied users at the VPTS, are currently signed up for the full upgrade of their security system with IDTECK's total security system.

About IDTECK

Long experience in biometric access control and time & attendance field, IDTECK products assure the most reliable technology out in the security market. IDTECK offers wide range of security products, to provide the best security solution to suit your needs. All of IDTECK products are certified by UL, CE, FCC, MIC, and RoHS to satisfy the standards for international exports.
